

Research Update June 2018

Now Recruiting:

COPD- Do you have COPD? You may be eligible to take part in this study which is looking at the effect of a new drug called Trelegy. Please contact Alyson Johnstone or Joanne Kelly if you are interested

The Community Ageing Research Study 75+ (CARE 75+) Is a national study which will help us to better identify and manage frailty within primary care. Patients complete researcher led assessments (e.g. height weight Blood pressure) in their home. Letters of invitation are currently being sent out.

Early Arthritis- This study from Leeds is looking at anybody over the age of 16 with a musculoskeletal complaint (i.e. joint pain, aching muscles) or a first degree relative of anyone who has a diagnosis of Rheumatoid Arthritis. If you meet any of these criteria please contact our research team (Alyson Johnstone or Joanne Kelly)

Do you have **PSORIASIS** and not received any treatment for 2 months? If so please contact Dr Ikpoh for further details.

COMING SOON

Weight Watchers! Fancy taking part in this trial which starts in July. Eligible participants will have free access to Weight Watchers Flex Programme for one year

Completed Studies

CANASSESS- many thanks to all who participated in this study

Hedon Group were the highest recruiters in Hull and East Riding

NEWS

We are looking for patient representatives who would like to be part of a small virtual group where we can promote issues or questions that patients feel are important within the research community. We will also be able to give regular updates of research activity in the practice whilst welcoming any feedback on how we can increase engagement within the community .If you would like to be involved with this exciting initiative then please let reception know.

Research Team:

Dr Margaret Ikpoh

Research Nurse Alyson Johnstone

Research Health Care Assistant Joanne Kelly
